

REACH Certificate of Compliance

OptiFuse fully supports and hereby certifies complete conformance to the requirements of REACH's 169 SVHC (Substances of Very High Concern), the European Community Regulation standard about chemicals and their safe use (EC 1907/2006) which is a new law entered into force on June 1, 2007 which will be phased in until 2018.

OptiFuse is committed to providing safe products consistent with the improvement and protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.

OptiFuse currently conforms up to June 20, 2016, Amendment O, and will continue to conform to the requirements of REACH as new amendments are released. Specifically, the below listed chemical substances are not present in our products for quantities totaling over one ton per producer a year, and are not present above a concentration of 0.1% by weight.

OptiFuse defines "**REACH Compliant**", to mean that banned substances are not intentionally added during the manufacturing process and have upper concentrations within REACH acceptable limits.

The ongoing status is based on OptiFuse's understanding of REACH and OptiFuse's knowledge of the materials that are used in its products.
